

TOTAL INK MANAGEMENT SYSTEM

■ Now available with Colormeter & quality control integration

Time is money, so it is important to get the right colour up and running as quickly and efficiently as possible

Not before a correct assessment of the economic impact on the printing job

With a timely and precise evaluation of fresh ink availability as well as all possible press return ink integration

By dispensing each formulation with the highest accuracy we guarantee the precision required for the most stringent printing jobs

Once the printing job is completed, all data is readily available for evaluation and analysis, with over 200 different reports available at a click of a button

Which is why **InkMaker Dispensing Systems** and **Maestro® Total Ink Management** software, used by thousands satisfied customers World-wide, makes so much sense!

Because at **InkMaker**, we created them with **fast, reliable and easy implementation in mind.**

The 5 Benefits of our Precision.

On The Spot "Just-In-Time, Just-Enough" Ink Preparation

Whenever you require, with our Dispensing Systems you can produce any formulation within minutes. With an InkMaker Dispensing System, no need to worry about holding stocks anymore; all you need to do is to dispense the required colour in the required quantity when you need it. It's that simple!

High Consistency and Reproducibility

Our Dispensing Systems are extremely accurate, fully automatic and controlled by our in-house developed software. We can guarantee the highest accuracy and consistency at all times.

Press Returns Ink Re-Integration

With our Dispensing Systems and Ink Management Software, the amount of excess ink will be remarkably reduced, as you can now dispense the required quantity only. Nevertheless, our Ink Management Software can recycle any left-over ink into new colours by adjusting the existing formula and dispensing only what is required to generate a new shade.

Traceability According to ISO Rules

With the need of traceability according to ISO rules, our Ink Management Software can generate over 200 reports according to ISO standards. Our Maestro software records all operations performed for each specific job, thus giving you perfect traceability. All information are available for evaluation whenever required.

Know Costs

Our Ink Management Software, at the end of every job, can generate a detailed job costing, ink usage evaluation, fresh ink stock levels as well as detailed data on returned ink, including quantity, value and expiration date.
